1. This Office action is in response to the application filed 1/21/04.

2. Claims 1-27 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Many prior art references indicate whether a vehicle is accelerating and at what rate it is accelerating. The most obvious example is the warning device taught by **Ruhl** [U.S. 4,171,030] (supplied by applicant) that determines the rate of change of vehicle acceleration and indicates when the acceleration is beyond a predetermined rate. However, the condition expressed by each independent claim is rather specific; that is, the warning system providing an indication of initial movement of the vehicle <u>if and only</u> <u>if</u> the speed of the vehicle is greater than zero but less than a predetermined value <u>and</u> if the vehicle is accelerating. This combination is considered novel and unobvious in light of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Blomenkamp [U.S. 3,601,794] determines the acceleration and deceleration of a vehicle.

Hawkins [U.S. 3,711,828] uses a tube connected to an engine manifold to indicate acceleration.

Schroeder [U.S. 5,805,060] is connected to the accelerator and generates luminous signals.

Tonkin [U.S. 5,838,259] provides an array of lamps at the rear of the vehicle to provide an indication of the state of motion of the vehicle.

Kashefy [U.S. 6,211,780] includes multi-colored lights to indicate the motion of a vehicle.
